

ASHI JAIN

Bhopal, India — jainashi2005@gmail.com — +91 8269665428 — LinkedIn — GitHub — LeetCode

Professional Summary

Final-year Computer Science student with hands-on experience in Data Science, Machine Learning and AI using Python and SQL. Built AI applications using LLMs, RAG, LangChain and Google Gemini, with FastAPI and Streamlit. Experienced in data cleaning, exploratory analysis and building Machine Learning models.

Skills

Languages: Python, SQL, C++

Data Science & ML: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, XGBoost, EDA, Feature Engineering, Model Evaluation

Deep Learning & NLP: PyTorch, Neural Networks, Natural Language Processing

Generative AI: LLMs, RAG, Prompt Engineering, LangChain, LangGraph, Google Gemini, Embeddings, ChromaDB, FAISS

Backend & Tools: FastAPI, Streamlit, REST APIs, Git, GitHub, AWS

Analytics: Power BI, Power Query, DAX, Excel

CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Experience

Data Analyst Intern | Tech Rudraum Pvt. Ltd., Indore, India Jun 2026 – Jul 2026

- Cleaned and structured **2,000 sales and product-return records** across multiple states, distributors and outlets.
- Validated data accuracy and consistency before analysis and reporting.
- Used Power Query and DAX to calculate **3 key metrics**: return percentage, total returns and state-wise contribution.
- Identified high-return regions through state-wise analysis and comparative reporting.
- Designed **6–7 interactive Power BI dashboards** with dynamic filters and slicers for stakeholder-ready insights.

Cloud Application Developer Intern (Training Program) | IntMavens Infotech Pvt. Ltd. Apr 2025 – Jun 2025

- Completed a **2-month cloud training program** covering IaaS, PaaS, SaaS, deployment models and cloud security.
- Gained exposure to **3 major cloud platforms**: AWS, Azure and GCP, along with Power BI, DAX and Power Query.

Projects

LeadFlow – AI Real Estate Sales Copilot | Python, FastAPI, React, LLMs GitHub

- Built an AI-powered real estate sales copilot to prioritize inbound leads, summarize lead context and recommend next-best actions.
- Developed a FastAPI backend with SQLite and REST APIs for lead creation, retrieval, AI analysis, prioritization and follow-up workflows.
- Implemented AI classification to segment prospects into **3 priority levels**: Hot, Warm and Cold.
- Designed a React dashboard using an **Open → Scan → Decide → Act** workflow for AI-assisted sales decisions.

KnowledgeGPT – RAG Knowledge Assistant | Python, LangChain, Google Gemini, ChromaDB, Streamlit GitHub

- Built an end-to-end RAG pipeline supporting **3 document sources**: PDFs, text files and webpage URLs, with automated chunking and embeddings.
- Implemented semantic retrieval using **ChromaDB vector search** to provide relevant context before LLM generation.
- Integrated Google Gemini with LangChain conversational memory for context-aware, multi-turn question answering.
- Developed a Streamlit interface covering **document ingestion → retrieval → generation**.

Multiple Disease Prediction | Python, Scikit-learn, Flask, Machine Learning GitHub

- Developed **3 disease-specific prediction models** for Parkinson's disease, heart disease and diabetes using clinical parameters.
- Compared **4 classification algorithms**: Logistic Regression, Decision Tree, KNN and SVM across disease prediction tasks.
- Combined base learners using a **Stacking Classifier ensemble** to improve predictive performance and robustness.
- Built a Flask web interface accepting clinical features and returning real-time disease classification results.

Education

Vellore Institute of Technology, Bhopal

2023 – 2027

B.Tech, Computer Science Engineering (AI/ML)

CGPA: 8.46/10.0

Achievements

- Solved **100+ problems** on LeetCode, strengthening data structures, algorithms and problem-solving skills.
- Advanced to **Round 3** of the KEN Case Study Hackathon.
