SUMMARY

Final-year B.Tech CSE (AI/ML) student at VIT Bhopal (CGPA: 8.45/10) with experience in Data Analytics, Power BI, SQL, Python, and Machine Learning. Built analytical dashboards and predictive models on datasets of 9,800+ records and completed a cloud application internship. Seeking Data Analyst / Business Analyst opportunities to leverage data-driven decision making.

Experience

Cloud App Developer Intern — IntMavens Infotech Pvt. Ltd.

April 2025 – June 2025

Assisted in deployment and testing of cloud-based applications using company infrastructure. Collaborated with development teams to troubleshoot and validate application functionality. Participated in cloud deployment workflows and software release activities. Documented deployment processes and supported application maintenance.

EDUCATION

VIT Bhopal University

2023-2027

Bachelor of Technology - Computer Science with Specialization in AI ML

- CGPA: 8.45/10.0

Madhya Pradesh Board Of Education

2022-2023

- Percentage: 88.4

Central Board Of Secondary Education

2020-2021

- Percentage: 91.2

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, SQL
- **Analytics and BI:** Power BI (DAX, Power Query), Excel (Pivot, VLOOKUP)
- **Data and ML:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Web:** HTML, CSS, JavaScript
- **Soft Skills:** Communication, Leadership, Teamwork
- **Core Subjects:** Database Management System, Operating System, Computer Networks
- **Design and Tools:** Canva, Figma, LaTeX

PROJECTS

Superstore Sales Analysis and Forecasting

- Performed end-to-end EDA on 9,800+ transaction records (18 features) using Pandas, Matplotlib and Seaborn uncovering key insights: West region leads sales, Technology is top category, Consumer segment drives maximum revenue.
- Built and compared ML forecasting models (Linear Regression vs Random Forest); IQR outlier removal improved Random Forest MAE from 266.
→ 67 and boosted R^2 by 3×; designed an interactive Power BI dashboard for stakeholder reporting

Real-Time Facial Recognition and Automated Attendance System

- Engineered a contactless attendance system using OpenCV and face recognition library, automating real-time webcam-based logging with SQLite storage and CSV report export.
- Implemented bulk-registration pipeline supporting batch enrollment from image folders, reducing manual effort and scaling the system to handle large user bases
